

Functional and Performance Test Plan

ServiceNow Import Functional and Performance Test Plan

Date	30 September 2026
Team ID	SWTID-2026-7764
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	N/A

Import, Transform, Reporting, and Performance Scenarios

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Table schema	Open Employee Test and inspect its dictionary fields.	Five specified fields exist and each field type is String.	Documented in project walkthrough; retain configuration screenshot.	Evidence noted; formal sign-off pending
FT-02	Workbook headers	Load a workbook with source headers Employee ID, Name, Email, Department, and Location to Employee Import.	The five source columns are staged correctly; Name maps to the target field Employee Name during transformation.	Formal UAT execution pending.	Pending
FT-03	Transform field mapping	Inspect Sample Spreadsheet Import and transform a source batch.	Map Name → Employee Name and map Employee ID, Email, Department, and Location to their same-named Employee Test fields.	Walkthrough documents Auto Map and Mapping Assist.	Evidence noted; formal sign-off pending

FT-04	Employee ID coalesce	Run an import containing existing and new IDs; review transform history.	Existing IDs update and new IDs insert; no duplicate is created.	Documented result: two inserted, two updated across four rows.	Observed ; attach evidence
FT-05	Identical re-import	Submit the same four-row file again and review transform history.	No records are reinserted; identical rows are ignored.	Documented result: zero inserted, zero updated, four ignored.	Observed ; attach evidence
PT-01	Import duration	Record workbook size, row count, instance, and elapsed transform time.	Measurement is recorded against a threshold agreed by the team.	No timing measurement or threshold supplied.	Not measured
PT-02	Dashboard response	Measure dashboard load with all three reports on the target instance.	Response time is recorded against an agreed threshold.	No timing measurement or threshold supplied.	Not measured
